

Flat Solar Panel

BL-10W

BRITE LED TECH PRODUCT

10w Monocrystalline Solar Panel with anodized aluminium alloy sturdy frame, size of 341 x 280 x 18mm with a weight of 1.3kg, has 3.2mm tempered glass which has a allowable hail load of a steel ball at 1 meter, has wire junction box on rear of panel.

All specifications as per below and comes packaged as bulk, 1 panel per box

Ideal for slow charging battery, commonly used for garden shed battery charging where you may not have 240v lighting and simply have a small battery you wish to keep topped up which supplies power for your lights etc, electric fence battery charging, garden lighting battery charging.

Always calculate your expected power usage, battery size to determine the best solar panel for your needs.

If panels are used as they are meant to be used and looked after then really your panels should last a lifetime without a doubt though we offer a warranty anyway

5yr structural warranty under normal operating conditions

25 year replacement warranty if reduced power output of panels to 80%
