BRITE LED TECH PRODUCT

Certified Design registration number : 319090

Water Proof, Shock Proof, Vibration Proof, Rust Proof

5 Years Warranty

Complies With ADR 47/00, 49/00 and 6/00 Cat 2a

Stop/Tail/Indicator 12volt unit with 72 LED's 36 Amber / 36 Red LEDs with 1 Red Reflex Reflector in middle. Black Base 215mm x 100mm x 47mm with 400mm of wire fitted to each module. Comes complete with Stainless steel nuts/bolts/washers and screws.

Simple Assembly instructions

1. Mount base plate with the 2 stainless steel bolts/nuts/washers supplied
2. Wire up the 2 led modules and can conceal the joins within the lamp housing

Wire colour codes are standard as follows:

White – Earth

Red – Stop

Brown – Tail

Yellow – Indicator

3. Use 8 small stainless steel screws supplied to screw down the modules to the base plate.
4. To complete the lamp assembly simply push on the front surround which will click into place by the 2 clips on each module holding the front surround against the lamp.
5. You can also fit lamps to a vehicle without using the base plate if preferred, this has a good advantage being it reduces the height of the lamp from 47mm down to 32mm and also then the led modules are affixed direct to vehicle body making them harder to be removed to help prevent theft of the most expensive part of the lamp, wires and joins can still be concealed within led lamp modules due to the unique recessed area between the circuit board and base of the lamps, providing no joins having to be exposed.

1 unit per Blister pack.
